PLACEMENT GUIDELINES**

The University of Toledo uses ALEKS® Placement to provide an accurate measure of students' current mathematical skills so that they will be accurately placed in their mathematics courses. ALEKS® uses adaptive questioning to determine exactly what students know and don't know about a topic. Students will gain a better sense of their strengths and weaknesses in math. They will then have a chance to work on those weaknesses and retake the placement up to two more times within a six-month period. Students must wait 48 hours and spend at least five hours of practice within the ALEKS® system in order to qualify for a re-take. The most important thing is to take the assessment seriously and give it an honest effort so that the assessment truly reflects their level of knowledge and math preparedness. The more time students spend with ALEKS®, the more topics they will review and master – and the better their placement! The cost is \$20 and paid directly to ALEKS®. More information can be found here: [www.utoledo.edu/it/aleks/](http://www.utoledo.edu/it/aleks/). Students can opt to take the old paper test in the Testing Center or ALEKS®, but not both. Once a student takes a MATH course, any subsequent ALEKS® placement scores will be invalid and will not be considered a replacement for course prerequisites.
