

COMPLEX ANALYSIS SEMINAR

ESSENTIAL NORMS OF COMPOSITION OPERATORS BETWEEN BLOCH TYPE SPACES

Ruhan Zhao

SUNY-Brockport

ABSTRACT: In this talk we give a new formula for the essential norms of the composition operators between Bloch type spaces in terms of the norms of the n -th power of the inducing map. New characterizations for bounded and compact composition operators between Bloch type spaces involving the same terms are also given.

SPECIAL TIME & PLACE

Date: Friday, October 2, 2009

Time: 2pm-3pm

Place: UH 3008
